Profile

AI Manager at Witte Projektmanagement GmbH since 09/2026: construction and project management—cost, schedule, and quality across offices—plus SI strategy, workshops, and SI software. Personal projects (evenings/weekends): agentic products, compliance SI, multi-agent studios, open data backends. TypeScript, Python, Rust, Julia, C++, Li; FastAPI/Next.js.

Projects

Obsevia

07/2025-09/2026 · Co-Founder & CTO · Berlin

SDS/EU compliance SI for chemical industry

Co-founded (obsevia.com): 49–88% faster, 43–87% cheaper, ~60% less manual work via validation pipelines and Graph RAG (FastAPI/Next.js, Kafka, Supabase). GDPR/EU AI Act checks. AI Nation grant (10/2025-03/2026).

Majico

04/2026-09/2026 · Founder

Branding and go-to-market for micro-SaaS founders

Founded majico.xyz: research, brand direction, and GTM in ~30 min instead of weeks. Shipped in a 3-week sprint (Next.js, multi-agent, Supabase, BullMQ, Stripe).

Librebase

2026-present · Builder

Open data platform for projects, databases, and agents

Supabase-shaped stack on lidb with a web console (Studio) and a hosted MCP endpoint so agents can create projects and instances (app.librebase.xyz).

Agentron

2024-present · Creator · OSS

Multi-agent studio

Open-source desktop hub for agent workflows — 1000+ downloads; local and remote LLMs. Sandboxed tools, secret-safe agent graphs (github.com/cap-jmk-real/agentron).

Languages & authorization

German (native) | English (fluent, near-native)
EU work permit · remote, hybrid, or on-site

Core strengths

- Dual M.Sc. computational science & sustainable chemistry
- Multi-agent orchestration + Cursor SDK supervisors
